

DO NOT further erode the diversity and variety of voices we hear, already severely limited by corporate mergers and the relaxation of rules. The American press is pathetic and I now get my news from European sources. I follow current events very, very carefully and the US press does not raise questions are obvious and begging to be asked. My fellow citizens are well-meaning but woefully uninformed due to the lack of serious debate or information. Please don't further weaken their ability to gain information about our nation and the world.
